

Language Tutor™ Phonics 1 Cards

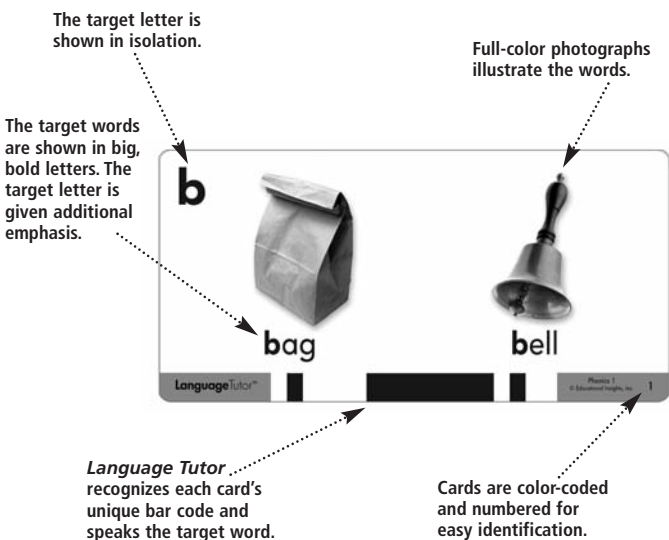

Why Language Tutor™?

Language Tutor provides an interactive, audiovisual experience that is appropriate for a wide range of students: struggling students in general education classrooms and special needs programs, ELL/ESL learners, and students who receive speech and language intervention.

The system uses a multisensory, model-and-response strategy for language acquisition. Students see the target words on the cards, *listen* to them being spoken on the Teacher track, and *repeat* them as many times as needed, progressing independently and at their own pace. When ready, students record themselves speaking the words and compare their speech with the Teacher track, building their skills and confidence in a systematic and motivating way. Perfect for differentiated instruction, individual students, and small groups, *Language Tutor* makes an excellent guided or center activity.

What's on the Lesson Cards?

This card set introduces and reinforces important phonics skills, including initial and final consonants and short and long vowels. Each card presents a target letter, two target words, and two full-color photographs.
