Why Language Tutor™?

Language Tutor provides an interactive, audiovisual experience that is appropriate for a wide range of students: struggling students in general education classrooms and special needs programs, ELL/ESL learners, and students who receive speech and language intervention.

The system uses a multisensory, model-and-response strategy for language acquisition. Students see the target words on the cards, *listen* to them being spoken on the Teacher track, and *repeat* them as many times as needed, progressing independently and at their own pace. When ready, students record themselves speaking the words and compare their speech with the Teacher track, building their skills and confidence in a systematic and motivating way. Perfect for differentiated instruction, individual students, and small groups, *Language Tutor* makes an excellent guided or center activity.

What's on the Lesson Cards?

This card set introduces and reinforces important basic vocabulary acquisition. Each card presents a themed vocabulary word and a full-color photograph.

The target word is shown in big, bold letters.

A full-color photograph illustrates the word.

Language Tutor reads each card's unique bar code and speaks the target word.

Cards are color-coded and numbered for easy identification.
