Academic Vocabulary

1. A group of words that contains a subject and predicate and can stand alone as a sentence is called _____.
   A. a dependent clause
   B. an independent clause
   C. a simple sentence

2. A group of words that contains a subject and predicate, but cannot stand alone as a sentence is called _____.
   A. a dependent clause
   B. an independent clause
   C. a simple sentence

3. A _____ has one independent clause and expresses one complete thought.
   A. complex sentence
   B. simple sentence
   C. sentence fragment

4. A _____ has two independent clauses that are joined together.
   A. simple sentence
   B. run-on sentence
   C. complex sentence

5. The _____ is the main action of the story.
   A. theme
   B. plot
   C. setting

6. The _____ is the major turning point in a story’s action.
   A. tone
   B. setting
   C. climax

7. A problem or struggle faced by a main character is called _____.
   A. conflict
   B. tone
   C. conclusion

8. The ending of the story where you learn how a character’s problem is solved is called _____.
   A. resolution
   B. climax
   C. summary

Academic Vocabulary

1. The _____ is the main action of the story.
   A. theme
   B. plot
   C. setting

2. A problem or struggle faced by a main character is called _____.
   A. conflict
   B. tone
   C. conclusion

3. The _____ is the major turning point in a story’s action.
   A. tone
   B. setting
   C. climax

4. The ending of the story where you learn how a character’s problem is solved is called _____.
   A. resolution
   B. climax
   C. summary

5. The emotional state in which a book is written, such as humorous, is called _____.
   A. tone
   B. theme
   C. point of view

6. The words spoken in a book or play are called _____.
   A. opinion
   B. plot
   C. dialogue

7. The side from which a story is told, such as a character narrating (telling) the story, is called _____.
   A. dialogue
   B. point of view
   C. personification

8. The message or main idea of a story is called the _____.
   A. plot
   B. theme
   C. climax

Never give up on your dreams.
Academic Vocabulary

1. The use of words to create pictures in the reader’s mind is called_____.
   A. definition
   B. exaggeration
   C. imagery

2. A____ is a comparison of two unlike things using the words like or as.
   A. contrast
   B. simile
   C. metaphor

3. A____ is a comparison of two unlike things as if they were the same.
   A. metaphor
   B. simile
   C. poem

4. An expression which means something different from what the words say is called_____.
   A. an idiom
   B. a metaphor
   C. a hyperbole

5. The repetition of the first sound of several words in a line or sentence is called_____.
   A. alliteration
   B. rhythm
   C. hyperbole

6. Giving human characteristics to something that is not human is called_____.
   A. personification
   B. alliteration
   C. metaphor

7. The use of words that imitate sounds is called_____.
   A. hyperbole
   B. onomatopoeia
   C. personification

8. A____ is a big exaggeration that is not meant to be taken literally.
   A. simile
   B. metaphor
   C. hyperbole

9. A____ story usually involving gods or heroes that explains the beliefs of a group of people.
   A. fable
   B. fairy tale
   C. myth

10. Stories which are based on real or imaginary discoveries in science and are often set in the future are called_____.
    A. nonfiction
    B. science fiction
    C. historical fiction

Lily licked a lollipop.

Beep! Beep!

The trees whispered.

I tried calling you a million times!
Academic Vocabulary

1. A fiction story that involves a crime or secret is called a _____.
   A. tall tale
   B. myth
   C. mystery

2. A story that is set in an unreal world, often with superhuman characters and monsters, is called _____.
   A. fantasy
   B. mystery
   C. historical fiction

3. A fiction story that is set in a particular time in history and gives realistic details about that time period is called _____.
   A. science fiction
   B. historical fiction
   C. fantasy

4. A person’s life story written by that person is called _____.
   A. a tale
   B. a biography
   C. an autobiography

---

Academic Vocabulary

1. Writing that creates a picture in the reader’s mind by giving lots of details is called _____.
   A. narrative writing
   B. persuasive writing
   C. descriptive writing

2. Writing, such as a newspaper article, that is meant to give information, is called _____.
   A. narrative writing
   B. expository writing
   C. descriptive writing

3. Writing that tries to convince a reader of the author’s point of view is called _____.
   A. descriptive writing
   B. persuasive writing
   C. expository writing

4. Writing that tells a story is called _____.
   A. narrative writing
   B. expository writing
   C. persuasive writing

---

Academic Vocabulary

1. To _____ is to tell briefly the main ideas of a piece of writing.
   A. scan
   B. summarize
   C. classify

2. A short plan of what you are going to write is called _____.
   A. a conclusion
   B. an introduction
   C. an outline

3. To _____ is to tell how things are similar or different.
   A. compare and contrast
   B. edit and proofread
   C. explain and persuade

4. The ending of a piece of writing, which usually goes over the author’s main idea, is called the _____.
   A. final draft
   B. introduction
   C. conclusion
Academic Vocabulary

1. A _____ is a book that contains words and their synonyms, with the words often arranged in categories.
   A. preface
   B. thesaurus
   C. periodical

2. An _____ is a book that is published yearly and contains information about sunrise, sunset, the weather, and other information.
   A. almanac
   B. index
   C. appendix

3. A _____ is an explanation that goes with a cartoon or a photograph.
   A. caption
   B. climax
   C. dialogue

4. A publication, such as a magazine, that is issued at regular intervals (daily, weekly, monthly, or other cycle) is called a _____.
   A. thesaurus
   B. bibliography
   C. periodical

Academic Vocabulary

1. The front page of a book containing introductory comments is called the _____.
   A. preface
   B. index
   C. table of contents

2. An _____ is an alphabetical list at the end of a book displaying the book's topics and the pages where they are found.
   A. almanac
   B. index
   C. appendix

3. An alphabetical list of hard or special words and their meanings, found at the back of a book, is called a _____.
   A. table of contents
   B. legend
   C. glossary

4. A _____ is a list at the back of a book showing the references used by the author.
   A. bibliography
   B. bibliography
   C. glossary

Academic Vocabulary

1. An _____ is a number that is close to an exact amount.
   A. addend
   B. estimate
   C. integer

2. Replacing a number with one that is easier to use, such as the nearest ten or hundred, is called _____.
   A. rounding
   B. factoring
   C. skip counting

3. Any number that is greater than 0 is a _____.
   A. prime number
   B. positive number
   C. negative number

4. Any number that is less than 0 is a _____.
   A. prime number
   B. positive number
   C. negative number

Mathematics

1. 269 → 300
Academic Vocabulary

1. Two numbers that are the same distance from 0 on the number line but lie in opposite directions are called ___.
   A. coordinates
   B. ordered pairs
   C. opposites

   ![Number Line with Points -2, 0, 2]

2. The set of whole numbers and their opposites are called ___.
   A. digits
   B. factors
   C. integers

   ![Number Line with Points -3, 0, 3]

3. The distance of a number from 0 on the number line is called ___.
   A. place value
   B. absolute value
   C. rate

4. Two operations that undo each other, such as addition and subtraction, or multiplication and division, are called ___.
   A. inverse operations
   B. order of operations
   C. coordinates

---

Academic Vocabulary

1. A ___ is any of the ten symbols (0, 1, 2, 3, 4, 5, 6, 7, 8, 9) used to write numbers.
   A. digit
   B. tenth
   C. factor

2. The value of a digit determined by its location in a number is called ___.
   A. regrouping
   B. counting
   C. place value

3. A way to write numbers using digits is called ___.
   A. standard form
   B. word form
   C. expanded form

4. A way to write numbers by showing the value of each digit is called ___.
   A. word form
   B. expanded form
   C. standard form

---

Academic Vocabulary

1. The ___ is a set of rules that states the order in which operations should be done.
   A. order of operations
   B. place value
   C. ordered pairs

2. The ___ states that you can add or multiply numbers in any order without changing the result.
   A. Associative Property
   B. Commutative Property
   C. Distributive Property

3. The ___ states that grouping addends or factors in different ways does not change the result.
   A. Commutative Property
   B. Associative Property
   C. Distributive Property

4. The ___ states that multiplying a sum by a factor is the same as multiplying each addend by the factor and adding the products.
   A. Commutative Property
   B. Associative Property
   C. Distributive Property
Academic Vocabulary

Mathematics

1. A ____ is a whole number greater than 1 that has only 1 and itself as factors.
   A. negative number
   B. prime number
   C. composite number

2. A ____ is a whole number that has more than two factors.
   A. negative number
   B. prime number
   C. composite number

3. The largest factor that two or more numbers have in common is called the ____.
   A. least common multiple
   B. least common denominator
   C. greatest common factor

4. Finding all the prime factors of a number is called ____.
   A. prime factorization
   B. transformation
   C. estimation

5. The factors of 5 are 1 and 5.

6. The factors of 8 are 1, 2, 4, and 8.

Academic Vocabulary

Mathematics

1. A ____ is the product of a number and any other number.
   A. factor
   B. multiple
   C. quotient

2. The ____ is the smallest number that is a common multiple of two or more numbers.
   A. greatest common factor
   B. exponent
   C. least common multiple

3. A number that shows how many times a number is multiplied by itself is called ____.
   A. an exponent
   B. a multiple
   C. a base

4. In a number with an exponent, a number that is multiplied by itself is called ____.
   A. a multiple
   B. a base
   C. an exponent

5. \(5^3 = 5 \times 5 \times 5\)

Academic Vocabulary

Mathematics

1. The number below the fraction bar that tells how many equal parts a whole has been divided into is called a ____.
   A. divisor
   B. numerator
   C. denominator

2. The number above the fraction bar that tells how many parts of a whole are being considered is called a ____.
   A. numerator
   B. denominator
   C. factor

3. An ____ is a fraction in which the numerator is equal to or greater than the denominator.
   A. ordinal number
   B. improper fraction
   C. integer

4. A ____ is a number that is made up of a whole number and a fraction.
   A. remainder
   B. mixed number
   C. unit fraction

5. \(\frac{3}{4}\)

6. \(\frac{5}{3}\)

7. \(2\frac{5}{6}\)
Academic Vocabulary

1. Fractions with the same denominator are called ____.  
   A. like fractions  
   B. unlike fractions  
   C. unit fractions

2. Fractions with different denominators are called ____.  
   A. like fractions  
   B. unlike fractions  
   C. equivalent fractions

3. A ____ is a fraction whose numerator is 1.  
   A. like fraction  
   B. mixed number  
   C. unit fraction

4. Different fractions that name the same amount are called ____.  
   A. equivalent fractions  
   B. improper fractions  
   C. like fractions

---

Academic Vocabulary

1. A fraction in which the numerator and denominator have no common factors except 1 is in ____.  
   A. standard form  
   B. expanded form  
   C. simplest form

2. A ____ is a common multiple of two or more denominators.  
   A. common denominator  
   B. like fraction  
   C. common factor

3. The ____ is the smallest multiple of two or more denominators.  
   A. simplest form  
   B. least common denominator  
   C. greatest common factor

4. Two numbers whose product is 1 are called ____.  
   A. reciprocals  
   B. opposites  
   C. equivalent

---

Academic Vocabulary

1. A ____ is a number with a decimal point and digits to the right of the point showing values less than 1.  
   A. decimal  
   B. whole number  
   C. percent

2. Decimals that name the same amount are called ____.  
   A. repeating decimals  
   B. equivalent decimals  
   C. estimates

3. A decimal whose digits repeat without end is called a _____.  
   A. percent  
   B. terminating decimal  
   C. repeating decimal

4. A ____ is a decimal that ends, having a set number of digits after the decimal point.  
   A. mixed number  
   B. repeating decimal  
   C. terminating decimal

---

HOT DOTS®
by Educational Insights
Academic Vocabulary

1. A _____ is a comparison of two numbers by division.
   A. function  
   B. ratio  
   C. dividend

2. A ratio that compares two quantities having different units of measure is called a _____.
   A. rate
   B. median
   C. percent

3. A _____ is a number sentence that shows two ratios are equal.
   A. proportion
   B. prediction
   C. translation

4. A ratio of a number to 100, meaning "per hundred," is called a _____.
   A. rate
   B. decimal
   C. percent

---

Academic Vocabulary

1. The amount a container can hold is called _____.
   A. volume
   B. weight
   C. capacity

2. The amount of matter in an object is called _____.
   A. capacity
   B. volume
   C. mass

3. A metric unit for measuring temperature is called _____.
   A. degree Celsius
   B. degree Fahrenheit
   C. kilometer

4. A customary unit for measuring temperature, used in the United States, is called _____.
   A. degree Celsius
   B. degree Fahrenheit
   C. kilometer

---

Academic Vocabulary

1. A _____ is a symbol, usually a letter, that stands for a number.
   A. coordinate
   B. digit
   C. variable

2. One number or variable, or a combination including operation symbols, is called on _____.
   A. expression
   B. exponent
   C. estimate

3. An _____ is a number sentence that uses an equal sign to show that two quantities are equal.
   A. event
   B. equation
   C. expression

4. An expression that contains a variable is called an _____.
   A. equation
   B. algebraic equation
   C. inverse operation

---

Hot Dots® by Educational Insights
Academic Vocabulary

1. A _____ is a number that, when substituted for a variable in an equation, makes the equation true.
   A. factor
   B. solution
   C. positive number

   3 + x = 10
   x = 7

   3. A _____ is a rule that produces exactly one value for every value of x.
   A. range
   B. ratio
   C. function

2. To substitute a given number for a variable in an expression to find the value of the expression is to _____.
   A. evaluate
   B. round
   C. simplify

   Find the value of b - 3 when b is equal to 12
   b - 3 → 12 - 3 = 9

4. A _____ displays number pairs for a set rule.
   A. function table
   B. tally chart
   C. pictograph

   \[ y = 4 + x \]

5. A _____ is a location in space that has no length, width, or height and is represented by a dot.
   A. point
   B. segment
   C. plane

6. A flat surface that extends without end in all directions is called a _____.
   A. face
   B. plane
   C. line

7. Lines that lie in the same plane but never cross are called _____.
   A. intersecting lines
   B. perpendicular lines
   C. parallel lines

8. Lines that meet or cross at a common point are called _____.
   A. line segments
   B. interesting lines
   C. parallel lines

   Lines that cross at right angles are called _____.
   A. perpendicular lines
   B. parallel lines
   C. lines of symmetry
Academic Vocabulary

1. A____ is a unit used for measuring angles.
   A. degree
   B. square unit
   C. meter

2. An angle that measures 90 degrees is called____.
   A. an acute angle
   B. an obtuse angle
   C. a right angle

3. An angle that has a measure greater than 0 degrees but less than 90 degrees is called____.
   A. an acute angle
   B. a right angle
   C. a straight angle

4. An angle that has a measure greater than 90 degrees but less than 180 degrees is called____.
   A. an acute angle
   B. an obtuse angle
   C. a right angle

Academic Vocabulary

1. An angle that measures 180 degrees is called____.
   A. a straight angle
   B. an obtuse angle
   C. an acute angle

2. Two angles whose measures add up to 90 degrees are called____.
   A. supplementary
   B. complementary
   C. adjacent

3. Two angles whose measures add up to 180 degrees are called____.
   A. supplementary
   B. complementary
   C. adjacent

4. Two angles that are side by side and share a vertex and a ray are called____.
   A. complementary
   B. obtuse
   C. adjacent

Academic Vocabulary

1. A triangle with all three sides that are the same length is called____.
   A. an isosceles triangle
   B. an equilateral triangle
   C. a scalene triangle

2. A triangle with two sides that are the same length is called____.
   A. a scalene triangle
   B. an equilateral triangle
   C. an isosceles triangle

3. A triangle with no sides that are the same length is called____.
   A. an equilateral triangle
   B. an isosceles triangle
   C. a scalene triangle

4. A triangle that has one right angle is called____.
   A. a right triangle
   B. an acute triangle
   C. an obtuse triangle
Academic Vocabulary

1. A triangle whose three angles are less than 90 degrees is called ___.
   A. a right triangle
   B. an obtuse triangle
   C. an acute triangle

2. A triangle that has one angle greater than 90 degrees is called ___.
   A. an obtuse triangle
   B. an acute triangle
   C. a right triangle

3. Either of the two sides that form the right angle in a right triangle is called a ___.
   A. vertex
   B. leg
   C. face

4. The longest side in a right triangle, opposite the right angle, is called the ___.
   A. hypotenuse
   B. base
   C. leg

Academic Vocabulary

1. A figure that begins and ends at the same point is called ___.
   A. an open figure
   B. a closed figure
   C. a solid figure

2. A figure that does not begin and end at the same point is called ___.
   A. an open figure
   B. a closed figure
   C. a solid figure

3. A ___ is a closed figure made up of three or more line segments.
   A. congruent figure
   B. circle
   C. polygon

4. A ___ is a closed figure in which all sides are the same length and all angles are equal.
   A. quadrilateral
   B. solid figure
   C. regular polygon

Academic Vocabulary

1. A polygon with four sides is a ___.
   A. prism
   B. quadrilateral
   C. regular polygon

2. A four-sided polygon whose opposite sides are parallel and congruent (the same length) is a ___.
   A. trapezoid
   B. pentagon
   C. parallelogram

3. A parallelogram with four congruent sides is a ___.
   A. rectangle
   B. rhombus
   C. trapezoid

4. A four-sided polygon that has exactly one pair of parallel sides is a ___.
   A. trapezoid
   B. parallelogram
   C. rhombus
Academic Vocabulary

1. A point in the middle of a circle that is the same distance from every point on the circle is called the_____.
   A. arc
   B. angle
   C. center

2. A line segment that connects two points on a circle is called a_____.
   A. center
   B. chord
   C. radius

3. A_____ is a line segment that connects the center of a circle to any point on the circle.
   A. radius
   B. chord
   C. diameter

4. A_____ is a line segment that connects two points on a circle and passes through the center.
   A. chord
   B. diameter
   C. radius

Academic Vocabulary

1. The distance around a circle is called the_____.
   A. circumference
   B. chord
   C. diameter

2. A number equal to the circumference of a circle divided by the diameter, or about 3.14, is called_____.
   A. pi
   B. degree
   C. radius

3. An angle with its vertex at the center of a circle is called a_____.
   A. right angle
   B. straight angle
   C. central angle

4. The part of a circle that lies between two points on the circle is called _____.
   A. a segment
   B. an arc
   C. a chord

Academic Vocabulary

1. The side of a polygon or a face of a solid figure by which the solid is measured is called a_____.
   A. vertex
   B. base
   C. height

2. A_____ is a solid with a polygon for a base and with triangular faces that meet at a single point.
   A. triangle
   B. prism
   C. pyramid

3. A_____ has a square base and four triangular faces.
   A. square pyramid
   B. triangular prism
   C. triangular pyramid

4. A_____ has a triangle for a base and three triangular faces.
   A. rectangular pyramid
   B. triangular prism
   C. triangular pyramid
Academic Vocabulary

1. A _____ is a solid figure with two parallel, congruent bases that are connected by faces that are parallelograms.
   A. sphere
   B. cylinder
   C. prism

2. The measure of the amount of space occupied by a solid figure is called _____.
   A. volume
   B. perimeter
   C. surface area

3. The sum of the areas of all the faces of a solid figure is called the _____.
   A. perimeter
   B. surface area
   C. volume

4. A _____ is a two-dimensional pattern that can be folded to make a three-dimensional figure.
   A. net
   B. base
   C. face

Academic Vocabulary

1. A _____ is a change in the position of a plane figure by means of a flip, slide, or turn.
   A. variable
   B. transformation
   C. function

2. A _____ is a movement of a figure along a straight line without flipping or turning.
   A. reflection
   B. translation
   C. rotation

3. A _____ is a movement of a figure to a new position by flipping the figure over a line.
   A. rotation
   B. translation
   C. reflection

4. A _____ is a movement of a figure to a new position by turning the figure around a point.
   A. slide
   B. reflection
   C. rotation

Academic Vocabulary

1. A _____ is a grid formed by two perpendicular number lines.
   A. coordinate plane
   B. table
   C. line graph

2. The horizontal number line (the line that goes left and right) on a coordinate plane is called the _____.
   A. x-axis
   B. y-axis
   C. line segment

3. The vertical number line (the line that goes up and down) on a coordinate plane is called the _____.
   A. x-axis
   B. y-axis
   C. coordinates

4. The two numbers making up an ordered pair used for locating a point in a coordinate plane are called _____.
   A. variables
   B. decimals
   C. coordinates
Academic Vocabulary

Mathematics

1. A graph in the shape of a circle that shows data as parts of a whole is called a _____.
   A. pictograph  B. line plot  C. circle graph

2. A graph that shows the frequency of data on a number line is called a _____.
   A. line graph  B. histogram  C. line plot

3. A _____ is a bar graph that shows the number of times data occurs within equal intervals.
   A. histogram

4. A _____ is a graph that uses a line to show changes in data over a period of time.
   A. line plot

---

Academic Vocabulary

Mathematics

1. The _____ is the number found by dividing the sum of a group of numbers by the number of addends.
   A. median
   B. mean
   C. mode
   \[ \frac{4+5+5+7+9}{5} = \frac{30}{5} = 6 \]

2. The _____ is the middle number when a set of numbers is arranged in order from the least to the greatest.
   A. median
   B. mode
   C. mean
   \[ 4, 5, 5, 7, 9 \]

3. The _____ is the number that appears most often in a set of data.
   A. mean
   \[ 4, 5, 5, 7, 9 \]
   B. mode
   C. range

4. The _____ is the difference between the greatest and the least numbers in a set of data.
   A. average
   \[ 4, 5, 5, 7, 9 \]
   B. mode
   \[ 9 - 4 = 5 \]
   C. range

---

Academic Vocabulary

Mathematics

1. A measure of the chance that an event will occur is called _____.
   A. probability
   B. frequency
   C. symmetry

2. A possible result in a probability experiment is called _____.
   A. a ratio
   B. an estimate
   C. an outcome

3. An outcome or a set of outcomes, such as rolling a sum of 4 with a number cube, is called _____.
   A. a prediction
   B. an event
   C. an estimate

4. The number of times that an event occurs is called _____.
   A. rate
   B. frequency
   C. range

---

Hot Dots®
by Educational Insights
**Academic Vocabulary**

**Mathematics**

1. An outcome that matches a specific event, such as rolling an odd number, is called a ___.
   - A. probability
   - B. likely event
   - C. favorable outcome

2. When events have the same chance of happening, they are described as being ___.
   - A. equally likely
   - B. impossible
   - C. certain

3. A chart with lines showing all the possible outcomes of an event is called a ___.
   - A. line plot
   - B. line graph
   - C. tree diagram

4. A reasonable guess about what might happen in a probability experiment is called ___.
   - A. a rotation
   - B. a prediction
   - C. an estimation

**Science**

1. The smallest particle of matter that has the properties of that matter is called ___.
   - A. an atom
   - B. an element
   - C. a compound

2. Any material made up of one kind of matter, such as gold, is called ___.
   - A. an atom
   - B. a cell
   - C. an element

3. A ___ is a single particle of matter made up of two or more atoms joined together.
   - A. cell
   - B. molecule
   - C. mixture

4. A ___ is a kind of matter made up of two or more elements joined together.
   - A. compound
   - B. system
   - C. conductor

**Academic Vocabulary**

1. A ___ is a change in the size, shape, or state of matter without a new kind of matter being formed.
   - A. force
   - B. physical change
   - C. chemical change

2. A ___ is a change in matter that produces a new kind of matter with different properties.
   - A. physical change
   - B. chemical change
   - C. force

3. A ___ is a combination of two or more kinds of matter that can still be separated.
   - A. mixture
   - B. compound
   - C. solution

4. A ___ is a mixture in which particles of different kinds of matter are evenly mixed.
   - A. moss
   - B. conductor
   - C. solution
Academic Vocabulary

1. A force that pulls objects toward the center of the earth is called _____.
   A. motion  B. friction  C. gravity

2. A change in an object’s position is called _____.
   A. location  B. motion  C. friction

3. A force that keeps two objects that are touching each other from sliding past each other easily is called _____.
   A. friction  B. energy  C. inertia

4. The property of matter that keeps a moving object moving or keeps a still object at rest is called _____.
   A. friction  B. force  C. inertia

Academic Vocabulary

1. The ability to cause change in matter is called _____.
   A. motion  B. energy  C. reflection

2. The energy that is stored in an object is called _____.
   A. potential energy  B. kinetic energy  C. radiation

3. The energy that an object has because it is moving is called _____.
   A. speed  B. potential energy  C. kinetic energy

4. Energy given off by the sun is called _____.
   A. solar energy  B. temperature  C. potential energy

Academic Vocabulary

1. Energy that produces heat from the movement of particles is called _____.
   A. thermal energy  B. gravity  C. potential energy

2. The direct transfer of heat between objects that touch is called _____.
   A. conservation  B. convection  C. conduction

3. The transfer of heat caused by the mixing of a liquid or gas is called _____.
   A. conduction  B. convection  C. evaporation

4. The transfer of heat through space by waves (disturbances created by moving atoms or molecules) is called _____.
   A. vibration  B. radiation  C. reflection

When you heat a pan of water on the stove, the movement of the water transfers heat through the pan.

A metal spoon in a cup of hot water gets warmed by the water.

Heat from the sun travels through space.
Academic Vocabulary

Science

1. The bouncing of light off a surface is called ______.
   A. reflection  
   B. refraction  
   C. radiation  

2. The bending of light as it moves from one material to another is called ______.
   A. radiation  
   B. refraction  
   C. reflection

3. A material that light can travel through is described as being ______.
   A. opaque  
   B. natural  
   C. transparent

4. A material that light cannot travel through is ______.
   A. opaque  
   B. unnatural  
   C. transparent

5. Energy that comes from the movement of positive and negative charges in matter is called ______.
   A. heat  
   B. electricity  
   C. global warming

6. An ______ is a property of certain tiny particles of matter that causes them to attract or repel other particles.
   A. electric charge  
   B. element  
   C. electric current

7. A continuous flow of electric charges is called ______.
   A. an electric current  
   B. a vibration  
   C. an orbit

8. A ______ is the path along which an electric current flows.
   A. magnetic field  
   B. satellite  
   C. circuit

9. A material through which electricity flows easily is called ______.
   A. a consumer  
   B. a conductor  
   C. an insulator

10. A material through which electricity cannot flow easily is called ______.
    A. an insulator  
    B. a consumer  
    C. a conductor

11. ______ is the space around a magnet where the force of the magnet can act.
    A. circuit  
    B. pole  
    C. magnetic field

12. An ______ is a strong temporary magnet made by passing an electric current through a wire.
    A. insulator  
    B. electromagnet  
    C. electric charge

Academic Vocabulary
Science

1. Similar cells that work together to perform a special function form a ___.
   A. tissue  
   B. molecule  
   C. cell membrane

2. A group of tissues that work together to do a special task, such as pump blood, forms ___.
   A. a nucleus  
   B. a compound  
   C. an organ

3. Organs that work together to perform a function form a ___.
   A. system  
   B. compound  
   C. tissue

4. The nose, lungs, and other organs that help the body breathe form the ___.
   A. digestive system  
   B. respiratory system  
   C. muscular system

---

Academic Vocabulary
Science

1. The heart, the blood vessels, and blood make up the ___ which moves blood throughout the body.
   A. muscular system  
   B. circulatory system  
   C. digestive system

2. The ___ which includes the mouth and stomach, breaks down food into a form that the body cells can use.
   A. digestive system  
   B. respiratory system  
   C. circulatory system

3. The ___ is made up of bones that give the body shape and protect the organs inside the body.
   A. muscular system  
   B. digestive system  
   C. skeletal system

4. The ___ is made up of muscles, tissues that make the body parts move.
   A. respiratory system  
   B. skeletal system  
   C. muscular system

---

Academic Vocabulary
Science

1. A group of living things interacting with one another and their environment form ___.
   A. a kingdom  
   B. an ecosystem  
   C. a species

2. All the organisms (living things) that live together in an ecosystem form a ___.
   A. community  
   B. food web  
   C. classification

3. A ___ is a group of the same kind of organisms that live together in an ecosystem.
   A. biome  
   B. population  
   C. habitat

4. A ___ is a large, major ecosystem, such as the tropical rain forest.
   A. community  
   B. shelter  
   C. biome
**Academic Vocabulary**

**Science**

1. A ____ is a living thing that makes its own food.
   - A. scavenger
   - B. consumer
   - C. producer

2. A ____ is a living thing that gets energy by eating other living things.
   - A. producer
   - B. consumer
   - C. prey

3. A ____ is a living thing that breaks down the remains of dead plants and animals.
   - A. carnivore
   - B. vertebrate
   - C. decomposer

4. A ____ is a group of food chains connected to each other within an ecosystem.
   - A. food web
   - B. population
   - C. mixture

---

**Academic Vocabulary**

**Science**

1. The wearing away and breaking apart of rock is called ____.
   - A. gravity
   - B. weathering
   - C. pollution

2. The process by which wind, moving water, and moving ice carry away bits of rock is called ____.
   - A. energy
   - B. rock cycle
   - C. erosion

3. A ____ is a huge mass of ice that moves slowly over land.
   - A. glacier
   - B. delta
   - C. sand dune

4. The dropping of sand, soil, and rock particles moved by water, wind, or ice is called ____.
   - A. weathering
   - B. deposition
   - C. pollution

---

**Academic Vocabulary**

**Science**

1. Small particles of rock, sand, and soil carried by moving water are called ____.
   - A. sediments
   - B. fossils
   - C. minerals

2. A ____ is an area of land formed by deposits of sediment where a river empties into the ocean.
   - A. glacier
   - B. delta
   - C. sand dune

3. The falling of a mass of soil or rock down a slope is called a ____.
   - A. sediment
   - B. deposition
   - C. landslide

4. A ____ is a hill of sand formed by the wind.
   - A. landslide
   - B. sandstone
   - C. sand dune
Academic Vocabulary

1. A ___ is a natural, solid material made up of particles arranged in a repeating pattern.
   A. fossil
   B. mixture
   C. mineral

2. The measure of how easily a mineral can be scratched is called ___.
   A. hardness
   B. texture
   C. color

3. The way light bounces off the surface of a mineral is called ___.
   A. luster
   B. streak
   C. color

4. The color of the powder left behind when a mineral is rubbed against a hard surface is called ___.
   A. acid
   B. streak
   C. luster

---

Academic Vocabulary

1. Rock that forms when hot, melted rock from inside the earth cools and hardens is called ___.
   A. igneous rock
   B. sedimentary rock
   C. metamorphic rock

2. Rock that forms from material that has settled into layers and been squeezed until hardened is called ___.
   A. metamorphic rock
   B. sedimentary rock
   C. igneous rock

3. New rock that forms when existing rock has been changed by heat and pressure is called ___.
   A. igneous rock
   B. sedimentary rock
   C. metamorphic rock

4. The slow, continuous process by which rocks change into other types of rock is called ___.
   A. the life cycle
   B. metamorphosis
   C. the rock cycle

---

Academic Vocabulary

1. Hot, melted rock that is formed deep below the earth's surface is called ___.
   A. crust
   B. magma
   C. sediment

2. A ___ is a cone-shaped mountain that forms when molten rock flows through a crack in the earth's surface.
   A. valley
   B. volcano
   C. meteor

3. A ___ is an opening through which molten rock rises to the earth's surface.
   A. vent
   B. focus
   C. streak

4. Molten rock that reaches the earth's surface is called ___.
   A. lava
   B. larva
   C. sediment
Academic Vocabulary

Science

1. A shaking of the ground caused by the sudden release of energy in the earth’s crust is called ______.
   A. an eclipse
   B. an earthquake
   C. an eruption

3. A ____ is a crack in the earth’s crust along which plates move.
   A. ray
   B. vent
   C. fault

2. A ____ is one of the many large sections of the earth’s crust that floats on a thick layer of hot, soft rock.
   A. plate
   B. vent
   C. fault

4. The point on the earth’s surface that is directly above the underground point where an earthquake began is called the ____.
   A. vent
   B. epicenter
   C. crust

---

Academic Vocabulary

Science

1. The layer of air that surrounds the earth is called the _____.
   A. atmosphere
   B. climate
   C. cloud

3. The weight of air as it presses down on the surface of the earth is called ____.
   A. mass
   B. air pressure
   C. atmosphere

2. The amount of water in the air is called ____.
   A. temperature
   B. air pressure
   C. humidity

4. Any form of water that falls from clouds is called ____.
   A. humidity
   B. pollution
   C. precipitation

---

Academic Vocabulary

Science

1. A huge body of air having about the same temperature, moisture, and air pressure throughout is called _____.
   A. a front
   B. an air mass
   C. atmosphere

3. A ____ is a funnel-shaped swirling column of wind.
   A. front
   B. hurricane
   C. tomato

2. The border where two air masses meet is called a ____.
   A. front
   B. hurricane
   C. streak

4. A ____ is a storm that forms over the ocean with violent winds, heavy rain, and high ocean waves.
   A. hurricane
   B. tomato
   C. front
Academic Vocabulary

Science

1. Winds that blow constantly from the same direction and affect large parts of the earth are called ___.
   A. air masses
   B. hurricanes
   C. prevailing winds

2. A large region that has similar weather conditions throughout the area is called a ___.
   A. continent
   B. climate zone
   C. community

3. The condition in which the sun’s heat builds up near the earth’s surface and is trapped by the atmosphere is called the ___.
   A. greenhouse effect
   B. water cycle
   C. climate zone

4. An increase in the average temperature of the earth’s atmosphere is called ___.
   A. pollution
   B. global warming
   C. solar energy

Academic Vocabulary

Science

1. Minerals, water, and other materials that people need or use from the earth are called ___.
   A. compounds
   B. producers
   C. natural resources

2. A ___ is a natural resource that is limited in supply and cannot be replaced once it is gone.
   A. conservation
   B. renewable resource
   C. nonrenewable resource

3. A ___ is a natural resource that can be replaced as it is used.
   A. conservation
   B. renewable resource
   C. nonrenewable resource

4. Sources of energy, such as coal, that formed from the remains of plants and animals are called ___.
   A. fossil fuels
   B. potential energy
   C. thermal energy

Academic Vocabulary

Science

1. Any star and the objects that move around it is called a ___.
   A. solar system
   B. satellite
   C. universe

2. A small, rocky object that orbits the sun is called ___.
   A. on asteroid
   B. a comet
   C. a meteor

3. A small mass of dust and ice that travels in an oval-shaped path around the sun is called ___.
   A. a meteor
   B. on asteroid
   C. a comet

4. A chunk of rock or metal from space that enters Earth’s atmosphere is called a ___.
   A. comet
   B. meteor
   C. satellite
### Academic Vocabulary

#### Science

1. A ____ is an object that revolves around another object, such as the moon orbiting Earth.
   - A. star
   - B. satellite
   - C. sun

2. A ____ is a huge system of stars, planets, gas, and dust that exists in one area of space.
   - A. galaxy
   - B. solar system
   - C. constellation

3. A ____ is a pattern of stars in the night sky.
   - A. comet
   - B. meteor
   - C. constellation

4. The ____ is everything that exists in space, including stars, planets, dust, and gases.
   - A. galaxy
   - B. universe
   - C. solar system

---

#### Social Studies

1. An imaginary line that circles Earth from east to west at its center is called the ____.
   - A. pole
   - B. equator
   - C. longitude

2. The distance north or south of the equator, expressed in degrees, is called ____.
   - A. elevation
   - B. longitude
   - C. latitude

3. An imaginary line that runs north and south on a globe and has a measure of 0 degrees is called the ____.
   - A. prime meridian
   - B. equator
   - C. pole

4. The distance east or west of the prime meridian, expressed in degrees, is called ____.
   - A. hemisphere
   - B. latitude
   - C. longitude

---

#### Social Studies

1. The directions north, south, east, and west are called ____.
   - A. map scales
   - B. legends
   - C. cardinal directions

2. A ____ on a map tells what the colors and symbols on the map mean.
   - A. grid
   - B. legend
   - C. compass rose

3. The part of a map that tells how much smaller the map is to the actual area is called a ____.
   - A. scale
   - B. legend
   - C. grid

4. A ____ is a map that shows cities, states, and countries.
   - A. population map
   - B. political map
   - C. physical map

---

[Map of Arizona with Phoenix marked]
Academic Vocabulary

Social Studies

1. A_____ is a narrow, V-shaped valley formed by a river.
   A. canyon
   B. mountain
   C. plateau

2. A_____ is a large area of high, flat land.
   A. hill
   B. plateau
   C. mountain

3. A_____ is a low, bowl-shaped area of land.
   A. canyon
   B. desert
   C. basin

4. The height of a geographic feature above sea level is called _____.
   A. elevation
   B. boundary
   C. latitude

Academic Vocabulary

Social Studies

1. A_____ is a stream or river that flows into a larger river.
   A. tributary
   B. delta
   C. waterfall

2. The place where a river flows into a lake or ocean is called the _____ of the river.
   A. tributary
   B. bank
   C. mouth

3. A_____ is a flat-topped mountain with steep sides, often found in dry areas.
   A. delta
   B. mesa
   C. desert

4. A narrow strip of land connecting two large bodies of land is called _____.
   A. mesa
   B. an isthmus
   C. an elevation

Academic Vocabulary

Social Studies

1. A person who studies the past is called a _____.
   A. librarian
   B. historian
   C. publisher

2. Information about the past that is passed on by interviews with people is called _____.
   A. oral history
   B. tradition
   C. culture

3. _____ is a record of a historical event made at the time of that event.
   A. An oral history
   B. A primary source
   C. A secondary source

4. A record of a historical event made much later after the event and by someone who did not witness it is called _____.
   A. an oral history
   B. a primary source
   C. a secondary source
Academic Vocabulary
Social Studies

1. Collections of important records about people or places are called ____.
   A. artifacts
   B. libraries
   C. archives

2. Objects that were made long ago that help people learn about the past are called ____.
   A. artifacts
   B. records
   C. memorials

3. The order in which events happen is called ____.
   A. chronological order
   B. alphabetical order
   C. logical order

4. A building, statue, or ceremony that honors a hero or an event is called a ____.
   A. landmark
   B. memorial
   C. factory

---

Academic Vocabulary
Social Studies

1. A journey made for a specific purpose, such as exploration, is called an ____.
   A. expedition
   B. export
   C. immigrant

2. To plan and control the course of a ship is to ____.
   A. text
   B. navigate
   C. text

3. The actions of a country in order to gain more land or power are called ____.
   A. export
   B. immigration
   C. expansion

4. An area of land that belongs to a country is called a ____.
   A. territory
   B. boundary
   C. tributary

---

Academic Vocabulary
Social Studies

1. A ____ is a small community of people living in a new place.
   A. frontier
   B. basin
   C. settlement

2. The edge of a country or settled region is called the ____.
   A. plateau
   B. settlement
   C. frontier
