Contents
- game board
- 9 puzzle pieces
- guide

WARNING: CHOKING HAZARD—Small parts. Not for children under three (3) years.
Choose a challenge from the guide and place it beside the game board.

Which connections do you need to make to complete this puzzle?

Begin arranging the nine tiles on the game board to connect the icons pictured on the challenge without creating dead ends.

Once you’ve put in all nine tiles AND made the right connections, you’ve solved the puzzle!

In this example, there needs to be a connection between the grey mouse and the garbage bin, but NOT between the cat and the grey mouse.

Usually there are many solutions to a challenge. A few solutions are shown on the reverse side of each challenge.

Here’s an easier way to solve the puzzles for younger players or beginners:

You can create dead ends as long as the icons pictured in the challenge are still connected.

In the example above, the cat is still connected to the white mouse.
SmartGames are brain-building, logical-reasoning games designed for one player. These games help foster strategy, logic, and problem-solving skills in puzzlers of all ages.
